

REGIONAL FORUM

ON SUSTAINABLE DEVELOPMENT FOR THE UNECE REGION

29 – 30 MARCH 2023 | HYBRID EVENT | GENEVA & ONLINE

SIDE EVENT CONCEPT NOTE

Event title

Voluntary Metropolitan Reviews

How to implement the SDGs across territorial units with their own political mandate and institutions

Background and Rationale

According to the OECD, metropolitan areas are defined as a population between 500 000 and 1.5 million people. The UNECE region has several such metropolitan areas which are often agglomerations of different separate cities and towns which became integrated into a larger size urban areas. These separate areas often retain some form of autonomy making it very challenging for the larger metropolitan agglomeration to coordinate sustainable growth of its infrastructure, personal mobility, safeguarding food security, managing waste and social development such as education, health, security and housing rules and regulations. This side-event focuses on the implementation of SDG 11 at a metropolitan scale which goes beyond the traditional VLR reporting and introduces instead a VMR (Voluntary Metropolitan Review). This side-event is organised as an opportunity to learn from experiences made by the metropolitan areas of Strasbourg, Barcelona and Grand Genève. Representatives will give an overview of their SDG implementation and highlight a particularly difficult moment in their urban growth process inviting the audience to brainstorm how they might have solved the respective difficulty.

The critical moments consist of the following:

BARCELONA: The 2030 Agenda of Barcelona, a legitimate tool for the assessment and balancing of social, economic and environmental needs;

GENEVA: Prospective visions for Greater Geneva. Inhabiting the City-Landscape of the 21st Century,

STRASBOURG: The PACTE, a community of territorial actors in dialogue and action to achieve the ecological transition; Conclusions by CSEND.

Session objectives and expected outcomes

To provide three examples of SDG implementation at a metropolitan level as a means of illustrating the need for a new SDG review namely the VMR (Voluntary Metropolitan Review)
